e-mail: francesco.fronterotta@uniroma1.it

In this paper I propose a reconstruction of the onto-cosmological perspective of Plato’s *Timaeus* and suggest an interpretation of it in the light of some contemporary approaches to ontology and logic, i.e. “ontological sequentialism” and “fuzzy logic”, attempting to use the categories and language of present-day ontology and logic to examine from a different point of view some aspects of the *Timaeus* onto-cosmology and of its logical scaffolding.
